

Dual Channel Transformer Isolator

- High quality audio isolating transformers housed in a strong aluminium case
- TRS jack socket input and outputs – so can be used either balanced or unbalanced, or any combination
- Useful for general interfacing – but especially for breaking hum loops between items of equipment
- Essential for connecting lap top computers to mixing desk for hum free results
- Low loss and wide flat frequency response
- Passive – so no power supply required
- Unbalanced to balanced conversion
- Highest quality components used throughout – including Neutrik jack sockets
- Compact size – 120 x 100 x 35mm
- Single channel version also available
